Volunteers At MD Camp

Happiness is . . . being a friend to a child having Muscular Dystrophy. Recently three Appomattox 4-H'ers, Lisa Dickerson, Joe Ford, and Ricky Guill, took the time out of their summer plans to serve as volunteer attendants at YMCA Camp Thunderbird in Chesterfield County for victims of Muscular Dystrophy. Lisa was in charge of the Arts and Crafts class while Joe and Ricky were in charge of a person having MD. Forty-two campers from throughout Virginia, ranging from ages 6 - 25, took part in a week of fun. The staff and attendants were all volunteer workers. Unbounded enthusiasm was the watchword as the campers participated in many fun and exciting programs and classes. Although activities were participated in by everyone the highlight of the camp was the joy of sharing a good time together.

Ricky, Joe, and Lia all agree that working with children having Muscular Dystrophy was a very rewarding experience, and all three are looking forward to next summer when they are going to volunteer their services again.

ANYONE WOULD SMILE when being presented with a one hundred dollar bill, but Mrs. Sue Shaner, center above, says she really has reason to smile as never before in her life has she won ANYTHING!

Recently the Concord Rescue Squad, in a money making project to help with the construction of a squad building, raffled tickets at a dollar each for chances on the $100-bill. Raymond Page, left above, of Appomattox was the man who sold Mrs. Shaner her winning ticket and really sold lots of them to help with this project. Calvin Colins, right above, of the Concord Rescue Squad, is shown as he presented Mrs. Shaner with the $100-bill on Tuesday morning. According to Collins the project was very successful

ENERGY SAVING TIPS FOR THE WEEK

1. This spring take the time to prepare for the hot summer days to come. Protect your outdoor cooling units from the sun. They should be placed on the north or shady side of the house.

If you are planning spring projects while the weather is cool, consider repainting the outside of your house. Light colors reflect the sun's rays rather than absorbing this energy.

Preheating your oven is often not necessary and may be a waste of energy. When preheating is required, such as when baking time is only a few minutes, avoid preheating for longer than 10 minutes. A timer can be used as a reminder that your oven is heated.

This spring have your central cooling unit serviced. An air conditioner that is out of adjustment can increase your operating costs while giving you very little cooling.
